

Sustainability Policy

The Komatsu Sustainability Policy articulates our clear commitment to addressing climate change and social demands. We strive to contribute to society through our business activities while fulfilling our responsibility to society and the environment.

■ Sustainability Policy Business continuity guidelines for business activities

Since founding, we have committed ourselves to Quality and Reliability in order to maximize the total sum of trust from all stakeholders, including society. Based on this Management Principle, we have made efforts to build strong relationships of trust with our stakeholders.

Our pursuit of coexistence has been handed down through generations, and our basic stance is to contribute to society through business activities. Our purpose is *creating value through manufacturing and technology innovation to empower a sustainable future where people, businesses, and our planet thrive together*.

We will continue to address issues that are important to both a sustainable society and our business, grow as a corporate group that can flexibly respond to changes in society and the external environment, further enhance our corporate governance, and contribute to society with our stakeholders.

What we do to empower a sustainable future where people, businesses, and our planet thrive together

With people

- We provide an environment where diverse and global employees can work safely and healthily as one team, with respect for each individual, and with satisfaction and pride.
- We nurture employees who can take on challenges in various jobsites and regions, create new value together with customers, and contribute to the realization of a sustainable society.
- As Komatsu Group, we shall respect human rights related to all of our business activities.

With business

- We contribute to society through our business activities by providing our customers with safe and highly productive products, services, and solutions that realize sustainable infrastructure development, resource development, and a recycling-oriented society.
- We build relationships with our business partners and local communities that enable mutual trust, fairness, co-existence, and co-prosperity.
- We comply with the rules of society, including laws and regulations, and strive to respond sincerely to the requests and expectations of all stakeholders, including society.

With the planet

- Through all of our business activities, we strive to reduce our environmental impact and preserve the global environment through the use of advanced technologies.
- We strive to increase both global environmental conservation and business growth through manufacturing and technological innovation.
- We pursue collaboration and value creation with our stakeholders towards a sustainable planet and future.

■ Endorsement for initiatives

WE SUPPORT

Komatsu expressed support for the UNGC (United Nations Global Compact) in 2008. Visit the following website for more information on how our initiatives relate to the Ten Principles of the UNGC.

[Web](#) Comparison with global principles (ESG Databook, P.37)
